The City of Livingston requires a permit for the construction of a new driveway or when adding to an existing driveway or when changing or altering the approach. The approach is the portion of the driveway at the street that crosses the utility easements, usually the first 10 feet of your driveway.

For open ditch driveways, the minimum culvert size required will be determined by the City of Livingston Public Works Director. All culverts must be ADS or RCP pipe. Owner to contact City of Livingston at (936)327-4311 to install culverts after owner has purchased culverts and marked driveway location.

All applications for a permit or proposed driveway approach on a state right-of-way within the city limits will be submitted to the Texas Department of Transportation (TXDOT) for approval prior to application for a city permit.
