Fire Code Plan Review	\$350.00
Fire Code Inspection	\$450.00

Site Plan

Fire Code Plan Review	\$250.00
Fire Code Plan Inspection	\$250.00

The construction valuation is determined by the greater of the declared valuation of the project or the valuation calculated using the International Code Council Building Valuation Data table, first update of each calendar year.

Example:

Square Foot Construction Costs

Group (2018 International Building Code)	IA	IB	IIA	IIB	IIIA	IIIB	IV	VA	VB
B Business	200.26	192.96	186.54	177.38	161.90	155.84	170.40	142.43	136.08

The Square Foot Construction Cost does not include the price of the land on which the building is built. The Square Foot Construction Cost takes into account everything from foundation work to the roof structure and coverings but does not include the price of the land. The cost of the land does not affect the cost of related code enforcement activities and is not included in the Square Foot Construction Cost.

Example: New Building

Group B occupancy

Type VB construction

10,000 square feet total building area

Declared construction valuation \$1,200,000.

Calculated construction valuation - 10,000 square feet X \$136.08 per square foot = \$1,360,800.

The calculated construction valuation is greater than the declared construction valuation so \$1,360,800 is used to calculate the Bureau Veritas fee for the project.
